Research data

Web-based survey on social networking site:

<http://www.draugiem.lv> (in English 'for friends')

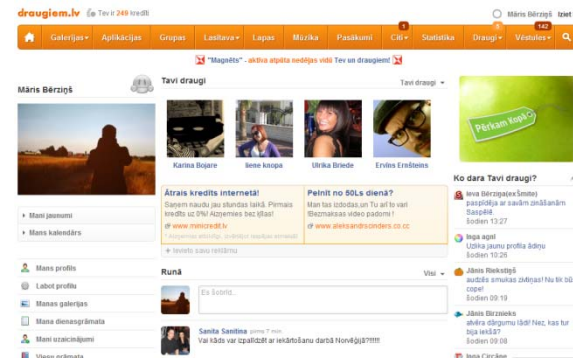

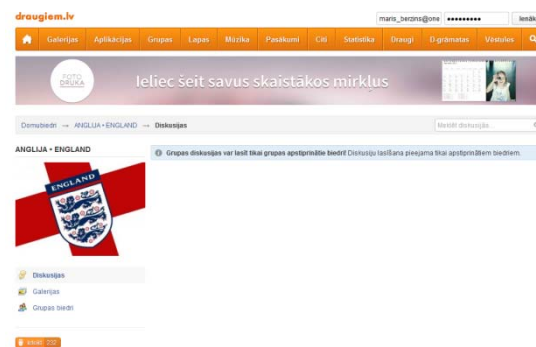

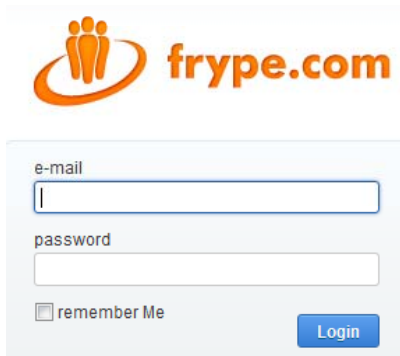

2.6 million registered website users who mostly are Latvians

Survey was posted to all users who were located in the **UK, Ireland, Germany, Sweden** and **Norway** (IP addresses). Initially first selection question excluded those who are only visiting these countries.

Several query rounds (2010 – 2014)

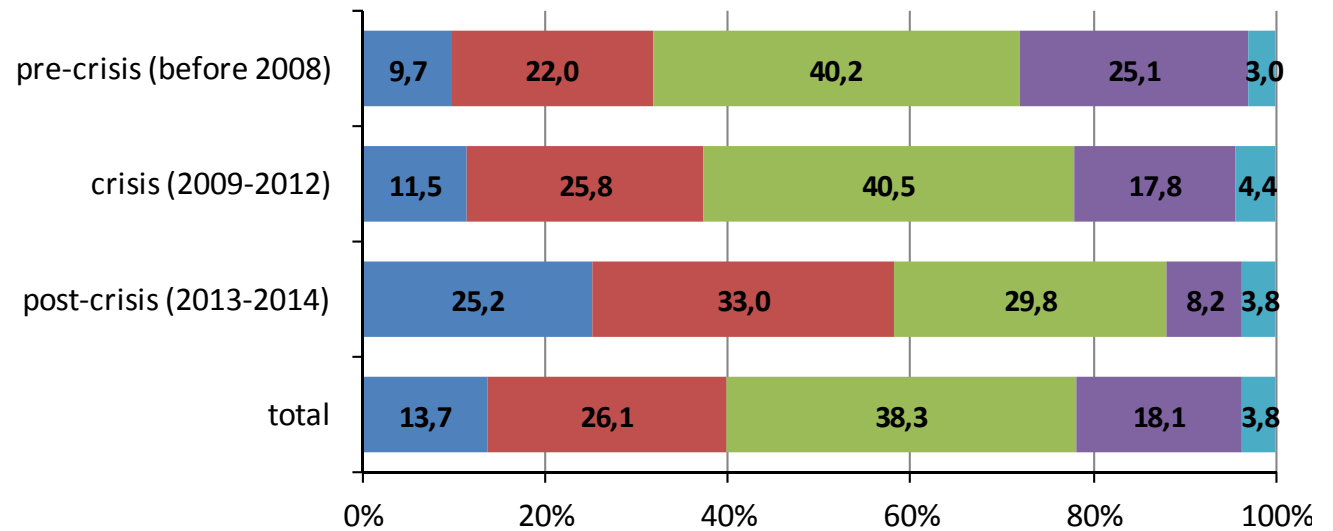

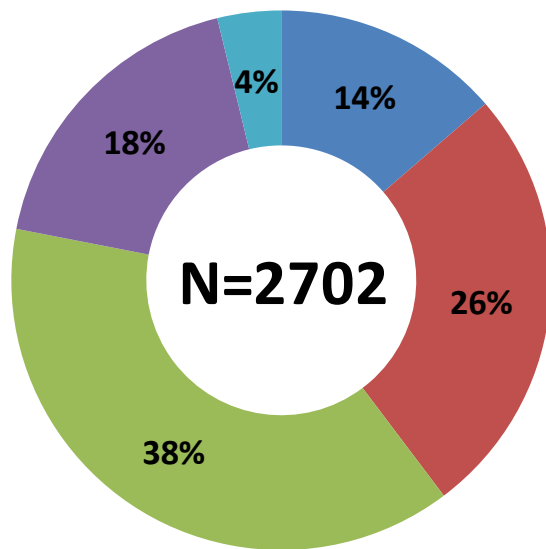

Sample used in this study consists of **2,702** Latvians living in the top destination countries at the time of survey (2014).

Age group of respondents: **15-74**

00:44:38

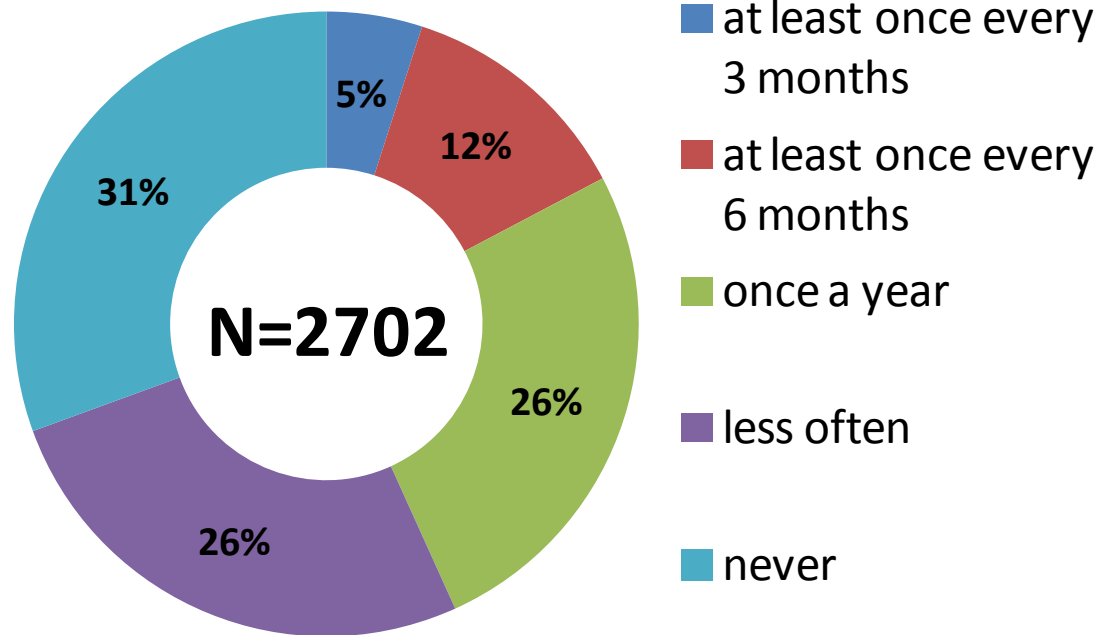

Travel frequency to Latvia and time period to moving for living abroad

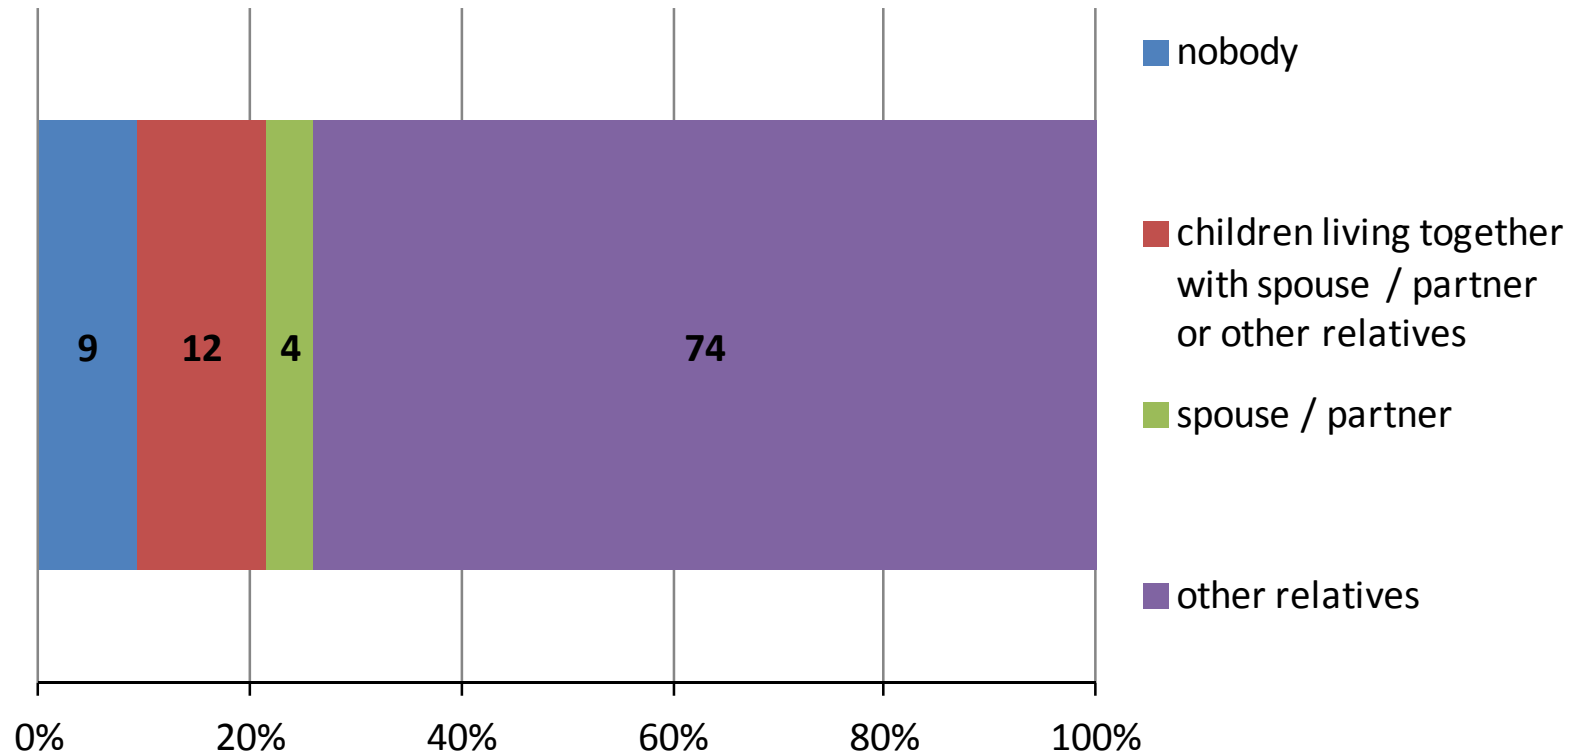

- at least once every 3 months
- at least once every 6 months
- once a year
- less often
- never

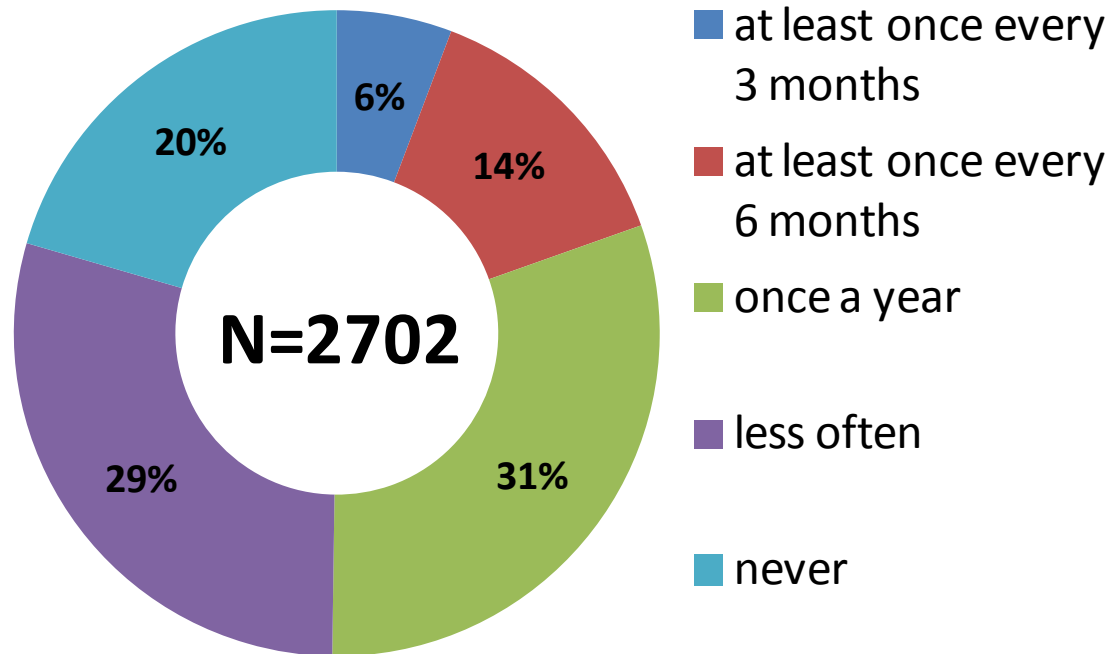

Travel frequency to other countries

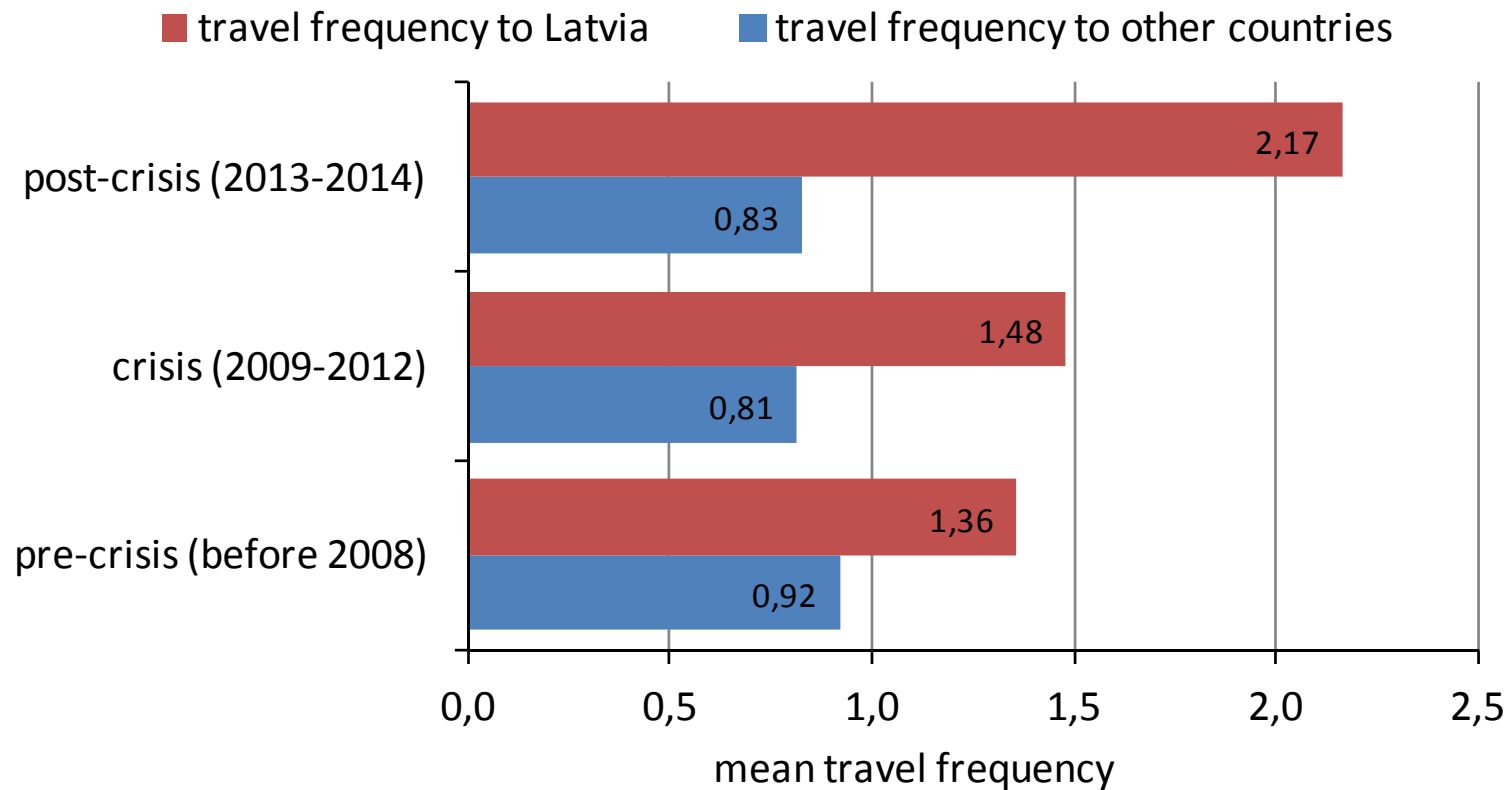

Relatives living in Latvia

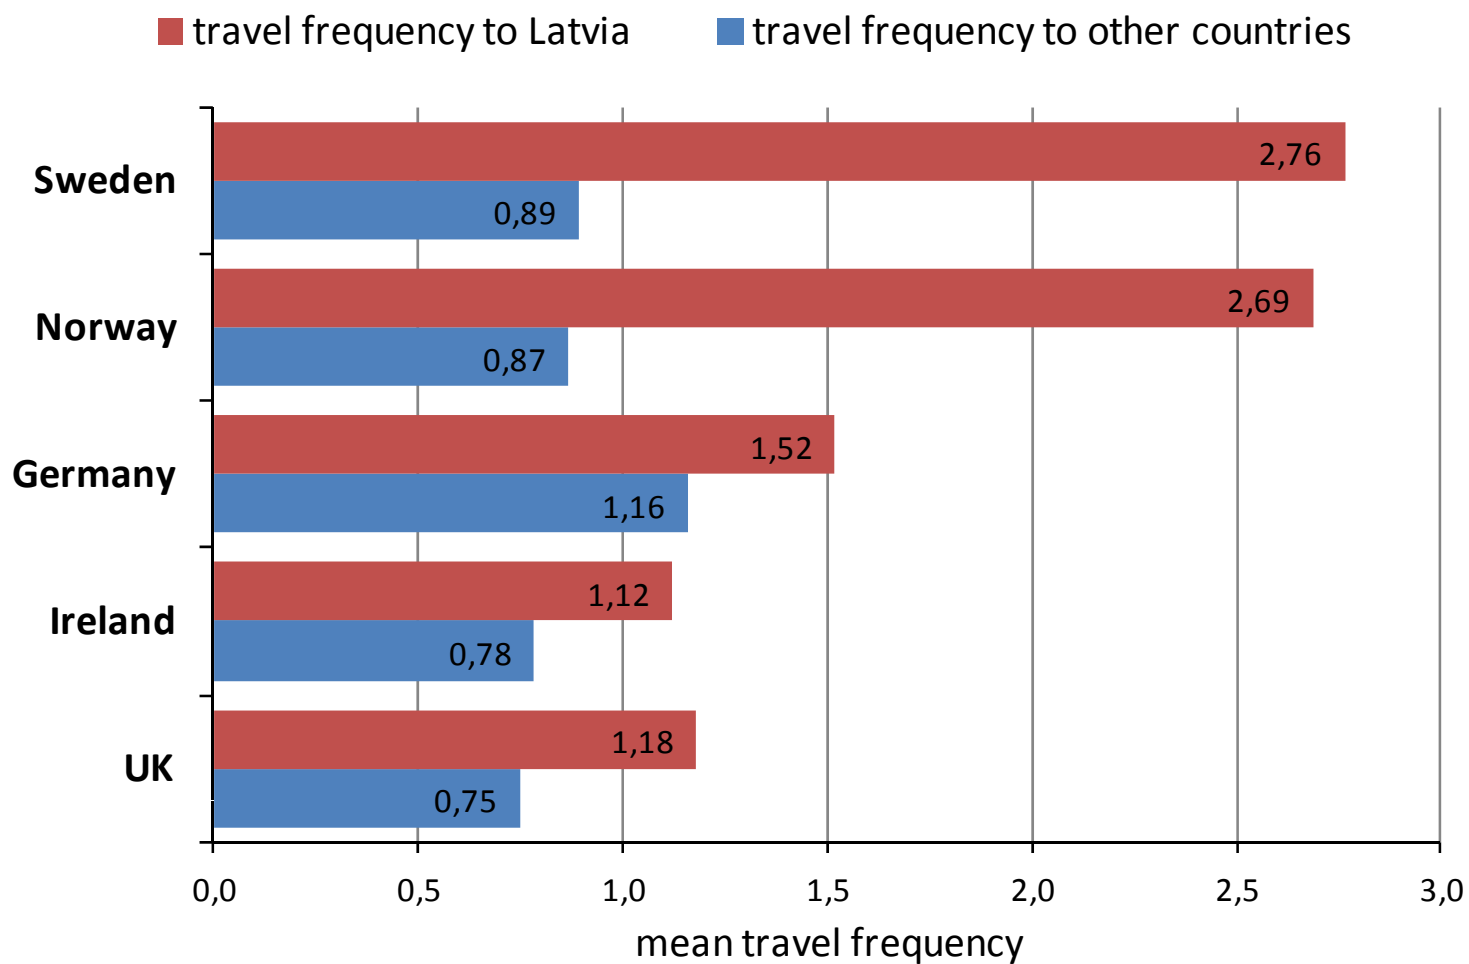

Travel frequency of visitors from Latvia

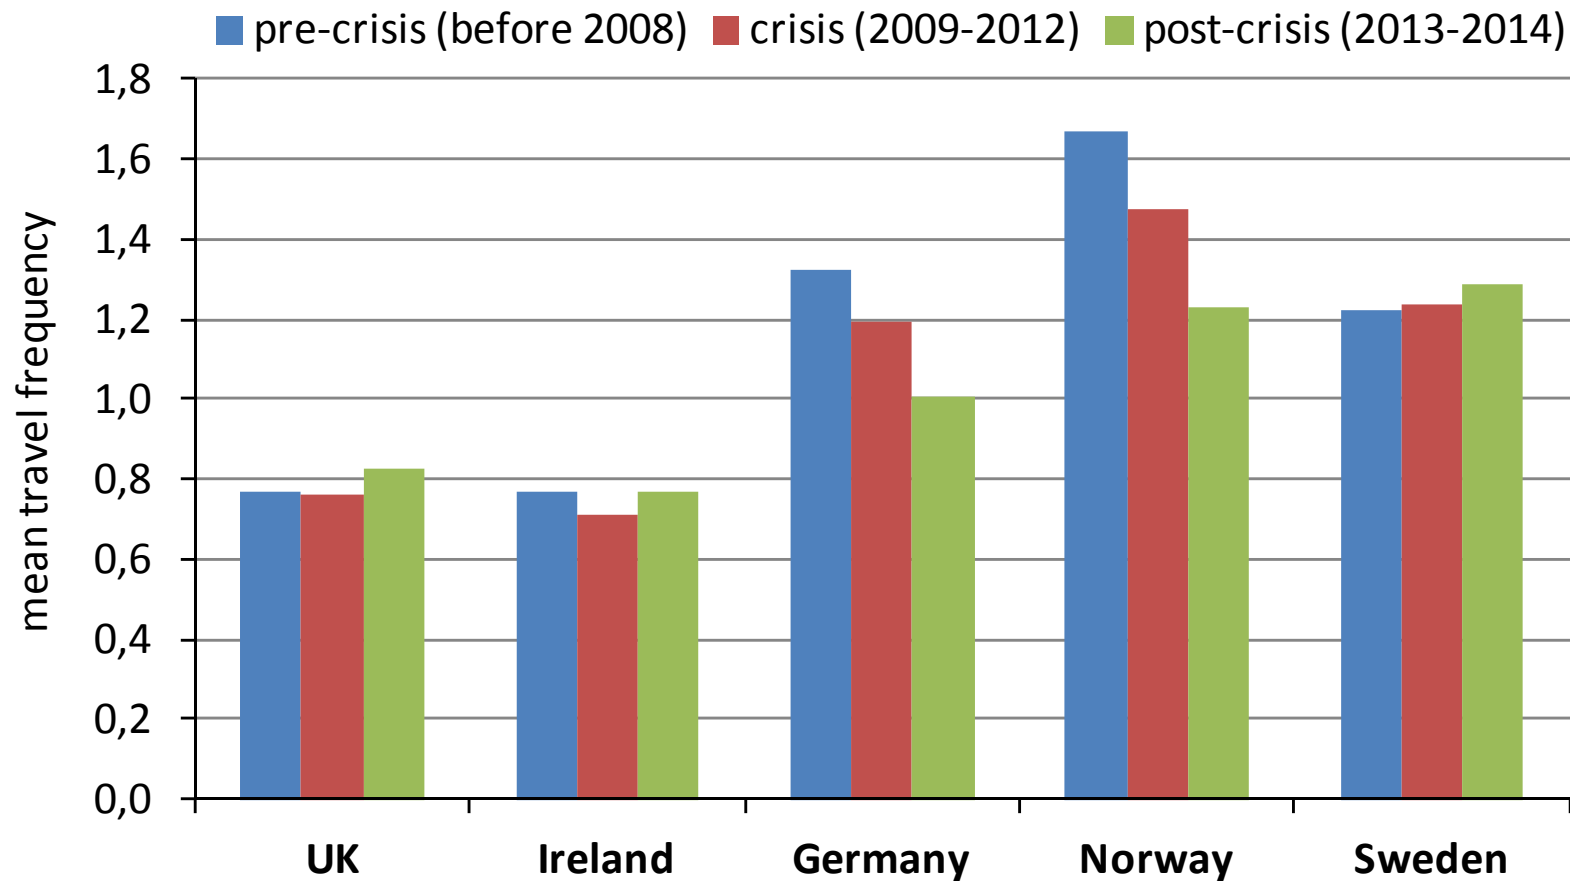

Mean travel frequency by different migration time periods of respondents

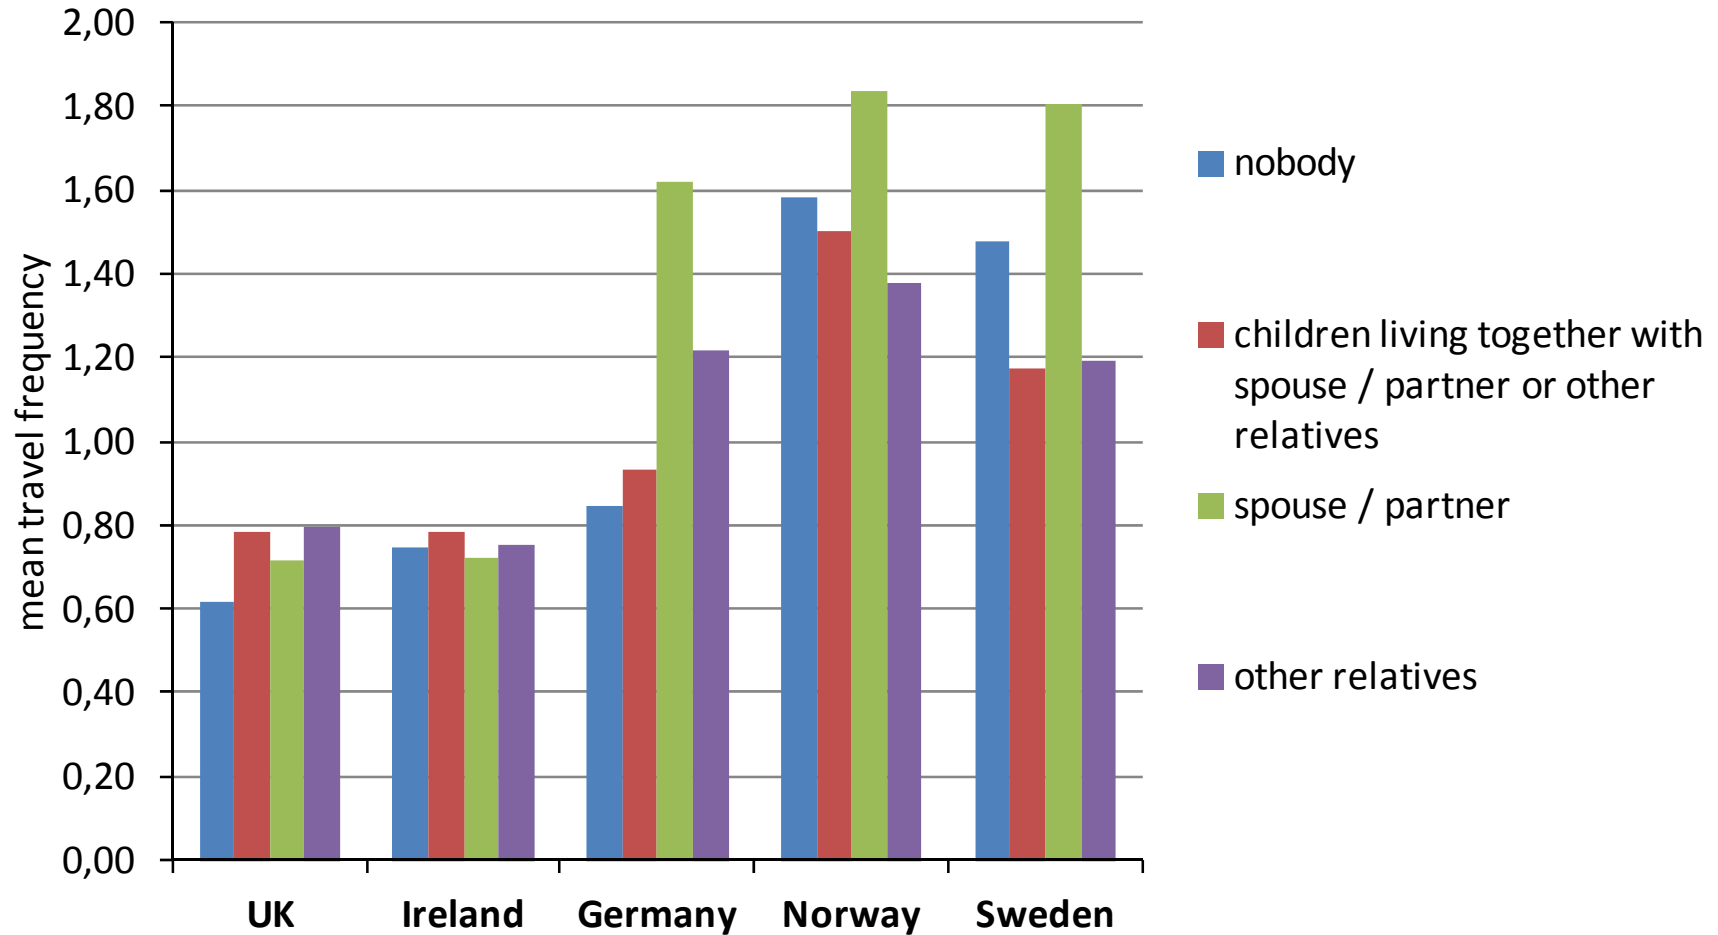

Mean travel frequency by top destination countries

Travel frequency of visitors from Latvia by different migration time periods of respondents

Visits from Latvia and remaining relatives in Latvia
